DETAILED ACTION

Applicant's response to the last Office Action, filed on January 10th, 2008 has been entered and made of record.

Response to Amendment

1. The 35 U.S.C. 112 second paragraph rejection of claims 1-22 are withdrawn in view of the amendments to claims 1 and 14, and the arguments for claim 20.
2. The 35 U.S.C. 102 and 103 rejections as stated in the previous Office Action have also been withdrawn due to the amendments of claims 1 and 14 to overcome the 35 U.S.C. 112 2nd paragraph rejection, and the arguments for claim 20.

Response to Arguments

3. Applicant's arguments, see the remarks, filed on 01/10/2008, with respect to the 35 U.S.C. 102, 103, and 112 second paragraph rejections of claims 1-22 have been fully considered and are persuasive. The rejections of claims 1-22 have been withdrawn.

Allowable Subject Matter

4. Claim 1-22 are allowed.
5. The following is an examiner's statement of reasons for allowance: Claims 1-22 have been amended to clarify that the pixel differences are between pixels of the same row. Neither Jiang, Miami, nor the known prior art have taught the determination of directional interpolation

Art Unit: 2624

by the comparison of a plurality of first and second horizontal pixel difference sets. In particular, the plurality of first pixel differences is on one row, and the plurality of second pixel differences is on a second row that is opposite (opposite of the pixel to be interpolated) of the first row.

Some of the prior art listed below teaches the method of using diagonal and vertical pixel differences to determine the direction for interpolation, and others also use a single horizontal pixel difference to further assist in the determination of the direction for interpolation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Yamashita, US 7167602 – teaches the differencing of horizontal pixels to determine a peak difference on the upper and lower rows.
- Michel, US 2002/0093587 – finds maximal and minimal value of the pixels in the scan line.
- Yoo et. al., US 2004/0233326 – calculates a first and a second horizontal pixel difference, as well as vertical and diagonal differences.
